

Various green building programs have been developed to help reduce buildings' impact on the environment. The LEED® (Leadership in Energy and Environmental Design) Green Building Rating System, developed by the US Green Building Council, is one of the most widely used building rating systems in Northern America.

Mediterranean Colors, LLC is dedicated to promote sustainable materials that maintain the value of old and new buildings, while improving their energy efficiency, life cycle, impact on occupants, and esthetic appeal. By specifying eco stucco™ products architects and designers can significantly contribute to project's rating toward LEED® certification.

eco stucco™ is a range of proprietary lime plasters designed to provide healthy, functional, and sustainable mineral finishes for interior, exterior walls and ceilings. These finish systems decorate and embellish walls & facades in the form of artistically hand-troweled artisan plasters. Essentially composed of natural mineral with minimal but expert preparation, eco stucco™ results in a long lasting crust of calcium carbonate derived from both the presence of sand and the carbonation of lime.

LEED CREDITS	POINTS
<b>Materials and Resources (MR)</b>	
MR 1.1: Building Reuse, Maintain 75% of Existing Shell	1
MR 1.2: Building Reuse, Maintain 95% of Existing Shell	1
MR 2.1: Construction Waste Management - Divert 50% From Disposal	1
MR 2.2: Construction Waste Management - Divert 75% From Disposal	1
MR 5.1: Regional Materials - 10% Extracted, Processed & Manufactured Regionally	1
MR 5.2: Regional Materials - 20% Extracted, Processed & Manufactured Regionally	1
<b>Indoor Environmental Quality (IQ)</b>	
EQ 4.1: Low-Emitting Materials, Sealers	1
EQ 4.2: Low-Emitting Materials, Paints & Coatings.	1
<b>Innovation in Design (ID)</b>	
ID 1.1: Innovation in Design: Lightweight Alternative to ceramic tiles, quarried stones, and bricks.	1
ID 1.1: Innovation in Design: Low Maintenance and Long Life Cycle.	1
